

“The Secret Language of Plants”

July 24-25, 2020

People have long lived in deep relationship with Nature, particularly the plant kingdom. The plants provided not only food, medicine, clothing and shelter; they were also teachers, healers and a source of infinite inspiration. From the strength of an oak, to the seed of an idea, to setting down roots - we turned to the green world for a deeper understanding of them and ourselves. Herbalists looked even deeper, examining the color, scent, texture, appearance, taste and growth habits of plants, to learn their personalities and interpret their secret language. This virtual experience with Tieraona is for those looking to tap into the intuitive and metaphoric side of herbal medicine.

“The Secret Language of Plants”

July 24-25, 2020
