Sta-Kool® 750 5 Year White Elastomeric Roof Coating is a flexible coating that resists cracking & peeling. The coating provides protection by helping to reflect the sun's heat and UV rays. This helps to cool roof surfaces, reduce interior heat gain and lowers cooling costs*.

- White Finish Protects Roofs
- Can Help Lower Cooling Costs*
- Expands And Contracts Up To 200%

*This product can help lower cooling costs in buildings that use air conditioning by reducing the surface temperature of the roof surface, which lowers the amount of heat gain that penetrates through the roof surface.

PREP: Pressure wash surfaces for best results. All surfaces must be clean and dry. Rusty metal must be treated and primed. Repair all leaks and cracks with White Roof Patch and Repair Fabric in accordance with patching instructions. Surfaces previously coated with aluminum, asphalt or tar coatings, should be allowed to cure for a minimum of one summer season prior to coating with this product.

APPLICATION: Surface and air temperatures must be over 50°F and rising. DO NOT apply if heavy dew or rain is expected within 24-48 hours. Apply in morning hours on a clear, sunny day. Use 3/4" nap exterior paint roller to apply one coat over all seams and joints. Wait 1-2 hours, then apply two (2) uniform coats over entire surface. Apply second coat perpendicular to first coat. Allow at least 24 hours between coats and 24-48 hours for full curing. DO NOT apply to areas where ponding water will exist. Not for use on EPDM or some single ply membranes. Roofs must have proper ventilation.

COVERAGE: Approximately 50-75 sq. ft. per gal. per coat. Total Coverage for two (2) coat application is 25-35 sq. ft. per gallon.

CLEAN-UP: Clean tools with soap and water.

PRECAUTIONS: Protect from freezing. Protective clothing and eyewear should be used during application. During transport, ensure that lid is tight and pail secure and upright. DO NOT allow pail to tumble as this will cause lid to loosen and leakage may occur. Do not transport on passenger seats or inside the passenger compartment of any vehicle. Store product in the cargo area of vehicle, and secure over protective cloths to prevent damage due to accidental spills. DO NOT reuse empty containers. Do not use on EPDM, TPO, PVC or other rubber/synthetic or single ply roofs. If there is any question regarding compatibility, test a small section first. Do not use in drinking water or food systems. Store unused product in a controlled environment, 55°F-80°F. Do not store in direct sunlight.

WARRANTY AND DISCLAIMER: Sta-Kool® 750 5 Year White Elastomeric Roof Coating is believed to be of good quality and to be in accordance with the specifications set forth herein, for a period of five (5) years from the date of purchase. This warranty is only applicable when this product is applied according to our directions, in two coats, and used with other Gardner products. This warranty does not cover flat roofs, or poor drainage surfaces where ponding water exists. All surfaces must maintain a minimum slope of 1/2" per foot (2.5°), to be eligible for warranty. If the coating does not perform as stated during the guarantee period, we will provide the original purchaser, with proof of purchase receipt, with replacement coating to repair the affected part of the roof. Failures due to acts of God, fire, structural defects or causes beyond our control are excluded from this guarantee. Gardner-Gibson, Inc. is not responsible for any labor, property or other consequential damages or costs incurred in the original or any replacement application. Except as stated above, we make no warranties or guaranties, expressed or implied, and none should be inferred.
