

# Flat Roof Restoration & Waterproofing

**Black Jack® Flat Roof Restoration System** is designed to save and restore worn roofs with a proven liquid applied silicone waterproofing sealant. Bright white finish reflects UV rays and reduces heat gain from roofs. Improves efficiency of buildings that have air conditioning.

Use on the following aged existing roof types:

Built-Up (BUR) & Mod-Bitumen (MB)    Single-Ply membranes: TPO, PVC, EPDM, Hypalon  
Spray Polyurethane Foam                      (SPF) Metal, Concrete & Tile  
RV, Trailers & previously coated surfaces

## Benefits to building owners

- Seamless waterproof membrane stops leaks
- Avoids costly roof replacement
- Minimal disruption to building occupants, no building closures
- Significant cost savings over a new roof

# Flat Roof Restoration & Waterproofing

**1 TAPE**

Waterproofing Seam tape is ideal on TPO, EPDM or metal seams to stop and prevent leaks.

Product code: 9086-1-75

**2 PATCH**

A thick liquid sealant that seals cracks & splits to stop leaks.

Product code: 5575-1-20

**3 PRIME**

Stain Block is used over asphalt roof surfaces to block bleed through and staining of white top coatings. \*Only needed on asphalt roofs.

Product code: 5587-7-30

**4 SEAL**

Silicone+ Roof Coating provides a seamless waterproof barrier to seal and protect worn leaky roofs.

Product code: 5576-1-30

## The Black Jack Eterna-Kote Flat Roof Waterproofing System:

1. Pressure clean all surfaces with a 2,500 psi pressure washer with a wide spray tip.
2. Apply Black Jack Waterproofing Seam Tape to all seams on TPO, EPDM or metal.
3. On asphalt roofs, apply Black Jack Eterna-Kote Stain Block to stop bleed through and staining of white top coatings. For TPO, EPDM or metal, this step is not needed.
4. Apply Black Jack Eterna-Kote Silicone+ Roof Coating across the entire roof surface to provide a watertight seal and a durable reflective finish.
