

Innovative Asphalt Coatings

About Gardner Asphalt Corporation

Gardner Asphalt is a family business that first started in 1945, with just one small manufacturing plant. Since then, the organization expanded through growth and acquisitions, to strategic locations,

which benefit national and international business opportunities. Gardner now has a first class distribution network which includes 15 manufacturing

and warehousing facilities. This gives our customers the assurance that they can count on us to "deliver the goods."

The business continues to be successful due to our focus on key core values; "Quality products with great service." Professional contractors as well as consumers have grown to trust the Gardner brand for dependable products that do what they claim!

When you choose Gardner, you get more than just a bucket of "black sticky stuff". You get knowledgeable experts who understand all aspects of the business. Innovation is a key part of our strategy and we pride ourselves on learning something new every day. Products are merchandised and packaged to sell themselves. Recently, extensive packaging changes have incorporated E-Z to understand directions with "how to" photos that ensure customers choose the right product for their jobs. This packaging change has resulted in a decrease of customer misapplications by 82%. We are proud of this accomplishment and know that it has resulted in more satisfied customers.

Gardner continues to be the industry leader in asphalt technology. Today, Gardner spends significant funds on Research and Development, with capital expenditures far exceeding the nearest competitor of this traditional industry. Gardner holds 8 patents on asphalt technology and feels this continued investment is worthwhile. Because of the long-term view it has on the business, the company continues to invest heavily in building a structure, which will enable us to serve our customers for many years to come.

New polymer technology has advanced the performance of our products and provides many significant benefits. This is a major opportunity for growth and will drive new innovation. Also, the company has a complete line of environmentally engineered water-based products that meet the tough clean air standards today, that go into effect in the coming years. We are proud of these accomplishments, and will continue to be the leader in advancing the technology in this area.

Thank you for making Gardner the #1 supplier of packaged asphalt coatings in the world. Being the leader in this

industry is a job we take seriously and we will do our best to never let you down. If you ever have a problem, know you have a company at your side that is dedicated to making it right!

Thanks again for your continued support and making Gardner your first choice!

Today, Gardner spends significant funds on Research and Development, with capital expenditures far exceeding the nearest competitor of this traditional industry.

A Revolutionary Advancement In Roof Patching

SLEAK STOPPER®

RUBBERIZED ROOF PATCH

Why Leak Stopper ?

| | |
|--|---|
| <p>Typical roof cements seal OVER cracks. The problem is that this will work for a period of time, but does not offer a permanent repair.</p> | <p>Leak Stopper® contains Penetrex™ penetrating oils which enable the product to reach deep into the crack and seal below the surface for a permanent repair.</p> |
|--|---|

"Seals through the crack."

- Stops roof leaks instantly
- Specially designed for problem leaks
- Permanent repair
- Use in wet or dry conditions
- Rubberized to prevent cracking
- Lasts 2-3x longer than standard patches

A revolutionary advancement in roof patching and repair. This long lasting rubberized asphalt repair is specially formulated to penetrate deep into damaged areas and **stop roof leaks instantly!** The secret is Penetrex™, a unique penetrating oil that reaches deep into the crack and forms a complete seal. With the addition of liquid rubber, this flexible, high performance plastic cement provides a superior watertight bond that will stop problem leaks for good. Leak Stopper® is formulated to be used year round.

- Apply with a trowel or putty knife.
- Covers approximately 12 sq. ft. per gallon when applied 1/8" thick.

| ITEM# | SIZE | QTY. | UPC# |
|---------|---------------|----------|--------------|
| 0319-GA | 10.1 oz. tube | 12/crtn. | 025056031907 |
| 0311-GA | 1 gal. | 6/crtn. | 025056031105 |
| 0313-GA | 3.5 gal. | 44/plt. | 025056031303 |

Wet-R-Dri™ Roof Cement

A heavy duty, fibered asphalt repair mastic, designed for new construction or to patch roof surfaces. Use in wet or dry conditions to seal and stop leaks around flashings, skylights, vent pipes, chimneys, and valleys. Wet-R-Dry™ Roof Cement is ideal for the repair of cracks, seams, and holes in all roofing materials. It is also excellent for use below grade in heavy duty foundation waterproofing and damp-proofing. It is formulated for year round use.

- Apply generously with a trowel or putty knife.
- Covers 12 sq. ft. per gallon when applied 1/8" thick.

| ITEM# | SIZE | QTY. | UPC# |
|---------|---------------|----------|--------------|
| 0379-GA | 10.1 oz. tube | 12/crtn. | 025056037909 |
| 0371-GA | 1 gal. | 6/crtn. | 025056037107 |
| 0375-GA | 5 gal. | 33/plt. | 025056037503 |

Cold Process & Lap Cement

A fibered asphalt adhesive of heavy brush consistency. It is a liquid applied cement used in new construction as well as re-roofing to bond plies of built-up roofing materials and gravel to bare spots on existing gravel roofs. It also works well as a resaturant for severely worn roofs.

- Apply with a heavy brush or notched trowel.
- Covers 50 sq. ft. per gallon.

| ITEM# | SIZE | QTY. | UPC# |
|---------|--------|---------|--------------|
| 0361-GA | 1 gal. | 6/crtn. | 025056036100 |
| 0365-GA | 5 gal. | 33/plt. | 025056036506 |

Fibered Roof Coating

A heavy duty fibered asphalt coating of brush consistency. It is an easily applied protective coating that provides a durable waterproof barrier over existing roof surfaces. Proper maintenance can extend years of life to your roof. It is particularly adapted for use over composition, and built-up roofs.

- Apply with a brush.
- Covers 50 to 60 sq. ft. per gallon on built-up roofing.

| ITEM# | SIZE | QTY. | UPC# |
|---------|--------|---------|--------------|
| 0101-GA | 1 gal. | 6/crtn. | 025056010100 |
| 0105-GA | 5 gal. | 33/plt. | 025056010506 |

Non-Fibered Foundation & Roof Coating

A thin liquid applied asphalt coating designed to seal and penetrate exterior concrete and masonry surfaces while providing a moisture barrier. It can also be used as an anti-corrosive coating for below grade steel or metal piping. Seals and protects wood footings from decay and termites. For exterior use only.

- Apply with a brush or roller.
- Approximately 80 to 100 sq. ft. per gallon on foundations.

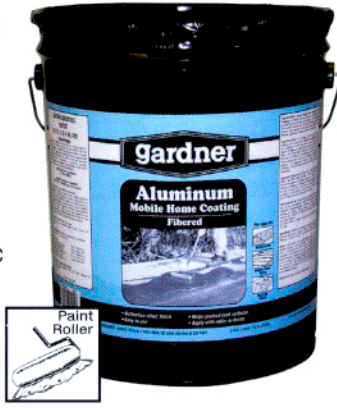

| ITEM# | SIZE | QTY. | UPC# |
|---------|--------|---------|--------------|
| 0121-GA | 1 gal. | 6/crtn. | 025056012104 |
| 0125-GA | 5 gal. | 33/plt. | 025056012500 |

Aluminum Mobile Home Coating

Mobile Home Aluminum Roof Coating is a fibered, reflective aluminized asphalt roof coating that protects and renews worn roof surfaces. Upon application, the aluminum flakes leaf to the surface forming a reflective surface. This reflective surface helps reduce heat buildup. Periodic application of this product is recommended.

- Apply with a roller.
- Covers approximately 50-75 sq. ft. depending on roof type.

| ITEM# | SIZE | QTY. | UPC# |
|---------|--------|---------|--------------|
| 6201-GA | 1 gal. | 6/crtn. | 025056620101 |
| 6205-GA | 5 gal. | 33/plt. | 025056620507 |

Plastic Roof Cement

Basic asphalt roof repair cement. It can be used for new construction, repairing areas around chimneys, vent pipes, gravel guards, down spouts, cracks in concrete and expansion joints on roofs. Do not use on wet or damp surfaces.

- Apply generously with a trowel or putty knife.
- Covers approximately 12 sq. ft. per gallon when applied 1/8" thick.

| ITEM# | SIZE | QTY. | UPC# |
|---------|--------|---------|--------------|
| 0341-GA | 1 gal. | 6/crtn. | 025056034106 |
| 0345-GA | 5 gal. | 33/plt. | 025056034502 |

Asphalt Saturated Glass Fabric

A black, durable glass fabric membrane designed to repair cracks, holes, seams and joints while reinforcing roof cements and coatings. Its durable, open mesh weave assures thorough bonding and allows for expansion and contraction. Use with Gardner Roof Products. Reinforce repairs on roofs, chimneys, gutters, copings, drain pipes and any other roof repair. Apply with roof cement to the surface, then press a strip of Glass Fabric into the cement and cover with additional layer of roof cement.

| ITEM# | SIZE | QTY. | UPC# |
|---------|----------|----------|--------------|
| 4502-GA | 6" x 50' | 12/crtn. | 025056450203 |

GIVE YOUR CUSTOMERS THE BRANDS THEY WANT!

Innovative Asphalt Coatings

A complete line of innovative asphalt based coatings for roofs and driveways. It's not just black sticky stuff anymore!

Advanced Elastomeric Coatings

Dedicated to advancing the use and performance of elastomeric coatings technology.

Professional's Choice Since 1913

Providing the professional contractor with quality coating for nearly a century. **Black Jack** was actually the first roof cement ever made.

Advanced Aluminum Coatings

The original aluminum roof coating is still the best seller, 60 years later!

Complete Wallcovering System

A complete line of quality wallcovering products. Engineered to make hanging wallpaper fun!

Made for the Professional Roofer

Dedicated to the professional roofing contractor for over 30 years. Commercial grade products and waterproofing systems specified by architects and demanded by contractors!

Professional Caulks and Adhesives

Engineered quality is why professional painters and wallcovering installers have come to trust our caulks and adhesives. Use **Dynamite** and get a "bang" out of life.
