# PERMANENT PATCH<sup>®</sup>

## Unique Patching and Repair Compounds

Multi-polymer technology gives tremendous advantages over standard repair products. By using multiple polymers we are able to achieve superior performance in 3 key categories: adhesion, flexibility and paintability. This enables us to have the highest quality product in the industry.

### PERMANENT PATCH<sup>®</sup> ADVANTAGES

- **ADHESION** - Excellent. Compatible with a variety of surfaces.
- **FLEXIBILITY** - Excellent. Tested to stretch 100% and recover without rupturing joints.
- **SAG CONTROL** - Excellent. Sets quickly and will not slump in high heat.
- **PAINTABILITY** - Excellent. Non-staining. Allows quick painting with no "flashing" or "bleed-through" of paint.
- **WATER RESISTANCE** - Excellent. Protects surfaces from deterioration.
- **COLOR** - #101 is white. #100 & #102 are off-white. All may be tinted with universal colors.
- **E-Z CLEANUP** - Soap and water cleanup.

Illustrations on each container depict uses and applications to simplify product selection.
