

COWBOY*

Clean
the belt

Before we start.

You're about to carry out some maintenance on your Cowboy bike. Before going further, we advise you to do the following steps:

- ❗ Some parts may be dirty and greasy, it is recommended to protect your floor and your clothes.
- ❗ If you have a bike stand, we advise you to use it. If that's not the case, you can put your bike against a wall or solid furniture.

If you have any question or encounter an issue while executing this tutorial, please reach out to our support team, we will help you gladly.

The tools you need.

— Sponge

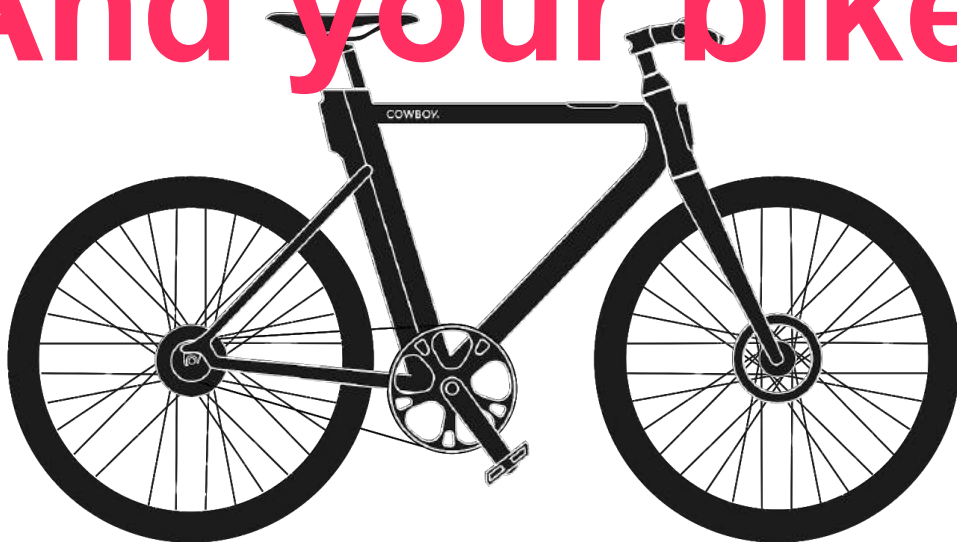

— Soap

— Water

And your bike.

Steps to follow.

- 01. Clean the belt with clear water.**
- 02. Clean the belt with soap.**

Estimated time: ~5 minutes.

01. Clean the belt with clear water.

Put the bike against a wall in a stable position.

Take your wet sponge and clean your belt by turning the pedal backwards.

02. Clean the belt with soap.

Add soap on your sponge and repeat the cleaning.

Don't rinse it afterwards.

COWBOY*

You're good to go!
