

Helo Aquatic Rescue Specialist (HARS 2.0)

The HARS is a hoistable water rescue swimming harness with an integrated PFD. This is our second generation of the HARS harness that has been used in the public safety market for over a decade.

HARS is the first hoistable harness that is equally as functional on the front as it is on the back. This highly adaptable harness accomplishes a wide range of tasks with its rated metal attachment points.

Rappel: waist attachment

Hoist: sternum and high spine attachment points

Fall Restraint: gunners belt attachment

- Removable sealed foam (an industry first) allowing for decontamination.
- Harness can be used without a flotation system.
