

INSTALLATION NOTES

Each Pendant is supplied fitted with a clear plastic **Cord Grip** that is used to secure the pendant to the cable

The **Socket & Bulb** are to be positioned so that the bulb sits approximately at the widest section of the pendant.

Installation Notes

Hamimi artisan crochet lamps are to be installed by a qualified electrician.

After unpacking the lamps and before installation, gently re-shape the lamp by lightly stretching it from top to bottom. Any remaining creases in the lamp that have occurred during packing and storage will fall out with gravity once the lamp has been suspended for a while.

Each lamp is supplied fitted with a clear plastic cord grip which is to be used to secure the lamp to the electrical cable so that the light bulb sits in the desired position, which is approximately at the widest point as indicated in the image above.

Electrical Lamp Fittings

Our crochet lamps are supplied as lampshades only. The electrical light fittings and cable will need to be sourced separately.

We recommend the single pendant light sets from www.creative-cables.com. Creative-Cables has dedicated online stores in many international locations and they supply attractive, certified fittings in a wide range of colours. Links to recommended pendant sets for different locations can be found on the product pages for each of our lamps on our website.

Light Bulbs

Light bulbs are not included. We recommend using Max 15W Warm White LED Bulbs. You may wish to experiment with the strength of the bulb to achieve your desired brightness/ambience in your space.

Cleaning & Care

Clean regularly with a feather duster, lint roller and/or vacuum with a furniture nozzle attachment. Can be wiped clean with a lightly dampened cloth.
