**which item was purchased**

*Items below are not manufactured  
for commercial use.*

### Installation Steps

1. Lay the lounge cushions out face down, fully extended.
2. Remove the (8) 1/4" x 1 1/2" screws and washers. These will be used to fasten the cushions to the base
3. The base has a cross section with 2 air holes in it. With the base in the inverted position and the Z brackets extended (as shown above), line up the bracket holes with the holes in the seat boards.
4. Place the washers and screws into the holes. Hand tighten to get the screws started.
5. Finish tightening the screws with a screw driver until you have a snug fit. This will complete the cushion to base installation.
6. Carefully turn the completed lounge over so that the base supports the cushions. You will then be able to fold the lounge cushions into the base in it's upright position.
7. The lounge is now ready for installation in the boat.
