

Hygiena Suggested ATP Levels of Clean

<p>Ultra-Clean Sterile surfaces and food prep areas</p>	<p>0-10</p>
<p>Very Clean Critical touch points</p>	<p>11-30</p>
<p>Good Clean Floor req'mt, and typical microfiber towel performance</p>	<p>31-80</p>
<p>Somewhat Dirty Caution: Surface should be cleaned and has some risk of contamination from disease-causing bacteria (typical mopping practices perform in this range)</p>	<p>81-200</p>
<p>Dirty Warning: Surface needs cleaning and has medium risk of contamination from disease-causing bacteria</p>	<p>201-500</p>
<p>Very Dirty Danger: Surface needs cleaning and has medium to high risk of contamination from disease-causing bacteria</p>	<p>501-1000</p>
<p>Filthy Danger: Surface needs cleaning and has high risk of contamination</p>	<p>1001-1500</p>
<p>Contaminated Clean immediately. Risk of contamination from disease-causing bacteria inevitable.</p>	<p>1500 ></p>
