Your skin is thirsty for this

RANAVAT BOTANICS JASMINE TONIQUE

Another power flower is jasmine, which is known for its superior hydration capabilities. Michelle Ranavat, the founder of **Ranavat Botanics**, created this gorgeous jasmine hydrosol as a first-step in an oil-based skincare line. "The most important part [of using a hydrosol] is to follow with an oil-based serum," she advises, "because that creates a barrier from the environment to really seal in all the hydration from the mist." Facial spritzes also help your skincare products absorb better. Apply them after cleansing, prior to your serum, oil, or moisturizer to optimize their benefits.
