

WEEK 4

# *Plastic Free Garden*

1. Make your own soil & fertiliser - start composting!
2. Create soil from pet poo - no more plastic bags
3. Grow your own food without plastic pots
4. Invest in eco-friendly gardening tools
5. Encourage native birds and beneficial insects into your garden

See this week's corresponding blog post for tips on how to achieve these

## PLASTIC FREE GARDEN SWAPS

Tick or cross them off as you go

- |  |   |
|--|---|
| Bokashi composting system                                | Bamboo gardening gloves                                     |
| Worm farm/tower composting                               | Wooden plant labels   |
| EnsoPet pet poo composter                                | Natural material gardening tools                            |
| Coir pots, wooden seedling flats, & newspaper pot makers | Pest control by insect hotels, microbat boxes, & birdhouses |
| Jute/coir rope, trellis, garden ties                     | Metal hose fittings & water sprayers                        |
|  | Metal watering cans & buckets                               |
