

seam allowance

keep clear of metal/plastic

Seam Allowance! This area of the fabric will not show in your final quilt, as it's part of the seam.

Cut line! This is the edge you use to cut out your squares.

9.5" Template: Use for larger shirts (will replace 4 - 5" blocks)

Optional- Cut out the inside of this template along the dashed line and use it to "frame up" the designs you want! The gap between the inner dashed line & the sew line needs to be clear of anything metal/plastic - snaps, rhinestones, zippers - as it could interfere with your sewing machine needle.

Sew Line! This is where you will actually sew - outside of this line WILL NOT SHOW in your final quilt top so align carefully!

keep clear of metal/plastic

seam allowance

Fold on this line & join with line on other template page to make 9.5" square template.

Join with line on other template page to make 9.5" square template.
