# INSTALLATION INSTRUCTIONS

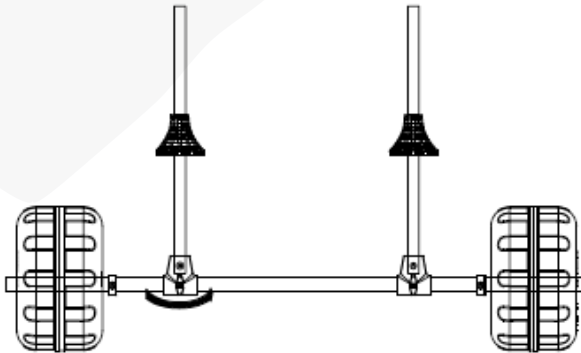

---

1. Take the cart out of the carton. Remove the PE bag. Remove the pin from both ends of the cart.

2. Install the wheels into both ends of the cart axle, then insert the pin.

3. Put the tube into the hole on the top. Adjust the distance between the two tubes according to the drain holes on the kayak. Tighten the nut to prevent the tube to move.

The max capacity of the cart is 75kgs suit for kayak, not for highway use.

Keep away from children when installing.
