SMART SAIL
USER GUIDE

WELCOME

Thank you for choosing a Bay Sports Smart Sail.

A great addition for long distance paddlers. The Bay Sports Portable Smart Sail for Kayak's & SUP's has a compact and foldable design and is made with a durable construction that is easy to set up and quick to deploy whilst on the move. Harness the wind and let it work with you, not against you.

The Seams on the Smart Sail are triple-stitched and the perimeter batten is made of a very strong composite material. The sail also contains a transparent window so you have maximum visibility.

It's easy to handle with a control strap that connects to your craft for easy manoeuvrability of the sail in changing wind conditions. Suitable for Kayaks, Canoes, Inflatable boats, and Paddle Boards.

Best use of this sail is downwind.

Visit our website at any time for more information.
