LED INSTALL

To wire the LED for on/off operation with latching switch:

When using switch in normally closed configuration.

Wire (+) as normal.

Do not wire (-). Install jumper between (-) and (NO).

KEY

NO Normally Open | The circuit is **OPEN** in the switch **OFF** position.

NC Normally Closed | The circuit is **CLOSED** in the switch **OFF** position.

C COMMON | Terminal to both functions.

MOMENTARY SWITCH OFF | Not depressed

LATCHING SWITCH OFF | Unlatched

WARNING

MAXIMUM LED VOLTAGE 12VDC

Switch/LED has been tested at the factory and determined to be functional.

NO RETURNS for led failures due to voltage overloading.
