

our mini guide for...

Combi Oven Cleaner

DELPHIS*

*eco PROFESSIONAL CLEANING

Application and Directions

Combi ovens: Automatic cleaning: Use undiluted. Dispense via the integral cleaning system, in accordance with the manufacture's instructions. Concentration can be adjusted via the oven control panel according to the degree of soiling. Normal dilution rate is between 0.5% - 2%.

Combi ovens: Manual cleaning: Dilute 1:10 parts water (100ml per ltr) into a trigger bottle. Select manual wash, spray the internal oven, close door and allow 10 minutes contact time. Restart the programme and complete manual wash cycle. Rinse thoroughly with clean water. Open oven doors and allow to air dry.

Fan assisted ovens: Dilute 1:10 parts water (100ml per ltr) into a trigger bottle and spray internal oven. Allow 5 minutes contact time then agitate with a clean cloth. Rinse thoroughly with clean water. Open oven door and allow to air dry.

Grills and other catering equipment: Dilute 1:10 parts water (100ml per ltr) and soak equipment in solution for 10 minutes. Agitate and rinse thoroughly with clean water. Allow to air dry.

Deep fat fryers: Dilute 1:10 parts water (100ml per ltr). Remove oil and add cleaning solution to fryer. Bring to the boil for 10 minutes. Remove solution and rinse thoroughly with clean water. Allow to air dry or dry with a cloth or paper towel before reusing the fryer.

Proper dosage saves cost and minimises environmental impact:

Delphis Eco encourage proper dosage and users to reduce waste going to land fill by recycling empty bottles.

Main Use

COSHH

Health and Safety

Use only as directed. Do not mix different cleaners. Seek medical attention if in discomfort or if any symptoms persist.

Eye Contact: Avoid contact with eyes, if product gets into eyes, rinse with water.

Skin Contact: Avoid contact with skin, if product gets onto skin wash with water and remove any contaminated clothing.

Ingestion: Do not drink, if swallowed drinking water may be beneficial, do not induce vomiting.

Inhalation: Avoid inhaling product, move to fresh air if in discomfort.

don't forget PPE..

Always wear the correct protective clothing if required. For best results we recommend using the correct dosing and colour coded microfibre cloths - please ask your manager for details.

how to dispose...

Dirty, used washing solution should be disposed of via drains that lead only to foul sewers. Do not allow detergent solutions to contaminate surface water drains. In the event that concentrated product should need to be disposed of, run small amounts to foul waste, diluting with plenty of water. For larger quantities, seek advice on disposal from the local authorities. Delphis Eco products are packed in fully recyclable containers. Empty containers should be rinsed thoroughly, the washings being run to foul waste. The containers may then be sent for recycling. Dispose of all waste in a responsible manner. Be aware of the environment.
