

our mini guide to using...

anti-bacterial sanitiser

cleaning method

Deep cleaning, raw food to ready-to-eat food (advised by FSA):

Apply a detergent solution directly onto the surface followed by Anti-Bacterial Sanitiser at the correct dilution. Allow minimum 5 minutes contact time and wipe clean. For food preparation and storage surfaces rinse with clean water after application. For larger surface areas such as floors, use a mop and bucket.

Clean as you go, ready-to-eat food only:

General cleaning: Remove any visible soiling. Apply Anti-Bacterial Sanitiser directly onto the surface, allow minimum 30 seconds contact time and wipe clean. For larger surface areas such as floors, use a mop and bucket.

Pressure washing: Use via dilution system on machine with steam if possible.

remember... when changing from raw food to ready-to-eat food, clean surface using minimum 5 minutes contact time

dilution guide

Tested and effective, through certain applications, at a dilution ratio of up to 1:150. Dilute through 30ml dispensing unit for general cleaning.

- General cleaning:** 1 part concentrate to up to 25 parts water.
- Light cleaning:** 1 part concentrate to up to 50 parts water.
- Heavy cleaning:** 1 part concentrate to up to 10 parts water.

main use

COSHH

health and safety

Use only as directed. Do not mix different cleaners. Seek medical attention if in discomfort or if any symptoms persist.

Eye Contact: Avoid contact with eyes, if product gets into eyes, rinse with water.

Skin Contact: Avoid contact with skin, if product gets onto skin wash with water and remove any contaminated clothing.

Ingestion: Do not drink, if swallowed drinking water may be beneficial, do not induce vomiting.

Inhalation: Avoid inhaling product, move to fresh air if in discomfort.

COSHH: Corrosive concentrate only.

don't forget PPE...

Users of cleaning products are responsible for wearing personal protective equipment. Always wear the correct PPE when hazards are present. PPE only protects the user while being worn.

how to dispose...

Dirty, used washing solution should be disposed of via drains that lead only to foul sewers. Do not allow detergent solutions to contaminate surface water drains. In the event that concentrated product should need to be disposed of, run small amounts to foul waste, diluting with plenty of water. For larger quantities, seek advice on disposal from the local authorities. Delphis Eco products are packed in fully recyclable containers. Empty containers should be rinsed thoroughly, the washings being run to foul waste. The containers may then be sent for recycling. Dispose of all waste in a responsible manner. Be aware of the environment.
