INSTRUCTIONS

1

Mark the holes in the “Flanges” on which surface the shelf should be placed.

Use a spirit level to keep the shelf hanging straight.

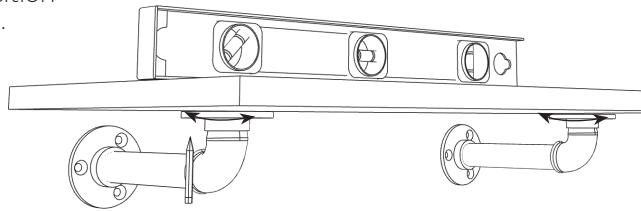

Depending on the surface; holes must be pre-drilled for plugs and / or “Flanges” fastened with screws.

Collect “shelf-carry-arms”.

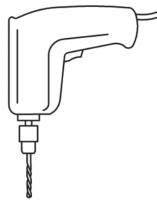

Place the shelf in the desired position and mark the holes with a pencil.

Check if shelf is level with spirit level - if not, adjust the flanges accordingly.

2

3

Pre-drill the holes in the shelf, with a 3,5 or 3 mm drill.

Be careful not to drill through!!

Mount the shelf with the screws.
