The Way Nature Intended

**How to work out how much CBD your pet is receiving based on their weight:**

1. What is your pet’s weight? Let’s say your pet weighs 40kg for this example.

Remember, one drop of oil is required for every 2kg of weight.

2. Divide the weight of your pet by 2kg (2kg represents one drop):

$$40\text{kg} / 2\text{kg} = 20 \text{ drops required}$$

**20 drops of 5% Pet Care oil, containing 1.46mg CBD per drop:**

$$1.46\text{mg} * 20 \text{ drops} = \underline{29.2 \text{ mg CBD delivered to your pet daily.}}$$

*\*\*The above calculation can be used for both 3% and 5% Pet Care oils – pets’ weight & CBD (mg) per drop of oil (whether using 3% or 5% oil) are variables\*\**

**Pet Care CBD Hemp Powder**

<i>Container size (grams)</i>	<i>Total CBD Content (mg)</i>	<i>Number of Scoops depending on Weight</i>		<i>Amount of powder delivered (g)</i>	<i>CBD Delivered (mg)</i>	<i>Product Duration (days)</i>
40	800	Up to 25kg	1 scoop	1.25	25	32
		25-50kg	2 scoops	2.5	50	16
