

Product Description/Use:

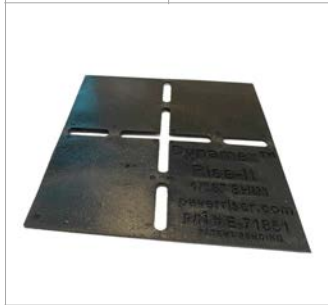

Fixed height rubber supports are designed to raise porcelain pavers, FRP or structural wood deck tiles over a solid flat surface such as a roof decks, balcony or at grade applications, including concrete or compacted sand. Fixed height pedestals are a simple, effective approach to creating a raised deck. The supports come in compatible thicknesses that can be stacked as needed to compensate for level discrepancies or sloped subsurfaces and ensure a perfectly level elevated floor.

Flat with tabs

E-71850 1/2"

E-71852 1/8"

Shim with cutout

E-71851 1/16"

E-71853 1/8"

Flat (no spacer tabs)

E-71855 1/2"

Specifications & Properties

Material	Recycled Polypropylene
Recycled Content	100%
Max Load (Single 1/2" piece)	10000 lbs
Max Load (six 1/2" pieces stacked)	2000 lbs
Length	6"
Width	6"
Spacer Tab Height	7/16"
Spacer Tab (joint space) width	1/8"

Sound Absorption through Sub-Structure
