## JESUS' BIRTH

Paper Nativity Scene Craft

# THE STORY OF JESUS' BIRTH

## NATIVITY SCENE CRAFT

### Materials Needed:

- One copy of pages 2, 3, and 4 of this file per student, printed SINGLE sided.
- Safety scissors, if appropriate for your age group
- Crayons, washable markers, or colored pencils, if desired
- Glue stick and/or clear tape (Glue stick works best.)

### Directions:

- Color the nativity figures, the stable, and the star as desired.
- Cut out the large rectangle on page 2 along the solid outer lines.
- Cut out the stable rectangle on page 3 along the solid outer lines, cutting into the stable along the solid lines so that the stable is "open". Cut out the star along the solid dark lines and save.
- Place the large solid rectangle from page two so that the dotted lines are down on the table. Fold it up and over along the dotted lines. Repeat along the second set of dotted lines.
- Place the stable rectangle from page three so that the picture is face down on the table. Fold it up and over along the dotted lines. Repeat along the second set of dotted lines.
- Turn the stable rectangle over. Tape or glue the bottom of the thin folded piece to the unfolded side of the solid rectangle. Flip the whole thing over and tape or glue the folded side of the solid rectangle to the unfolded side of the stable rectangle, creating a 3-D stable.
- Cut out the thin rectangles on page 4. Loop each rectangle to make a little circle and tape or glue the ends together.
- Cut out the nativity figures. Tape or glue one small circle to the back of each nativity figure, just above the base. The figure will lean back against the circle and stand. If the figure falls forward, adjust the circle higher up on the figure's back.
- Glue or tape the star to the top of the stable. Place the figures in or around the stable, as desired.
