

microdot[®] CO

Breath Analyzer

CAMBRIDGE SENSORS USA

microdot[®] Carbon Monoxide Breath Analyzer

A simple breath test establishes carbon monoxide levels in a subject's blood. Can be used on multiple patients with minimal effort. Results instantly displayed in %COHb or PPM for easy interpretation. Hard shelled carry case with mouthpieces allows easy storage and transportation.

JUDGES FEEDBACK: *"A terrific rapid assessment tool for all first responders when time and safety are critical."*
