# NAUTILO

Ref. AM-1001 / 1002 / 5009 / 5019

- A** Hour hand treated with Super-LumiNova®
- B** Minute hand treated with Super-LumiNova®
- C** Central second hand treated with Super-LumiNova® and logo ANONIMO depending on the models
- D** Water-resistant screw-locked crown
- E** Unidirectional rotating bezel with dot treated with Super-LumiNova®
- F** Date display

**Position 1:** The watch water resistance is guaranteed. The crown is screwed. In this position, the watch can be wound manually after unscrewing the crown (see “Getting started”).

**Position 2:** Date setting.

**Position 3:** Time setting.

**WARNING:** Always push and screw the crown after winding or setting the watch to ensure water resistant.

**NOTE:** When the watch has not been worn or wound for more than 35 hours, it is recommended to rewind it in order to ensure sufficient power reserve and accurate operation (see “Getting started”).

## GETTING STARTED

When the watch is used for the first time or when it stops, it must be wound manually as follow:

**1.** Unscrew the crown to release it.

**WARNING:** In this position water resistance is not guaranteed and the crown is not protected by the crown guard of the case.

**2.** Turn the crown clockwise for 15 -20 rotations to fully wind the movement.

**3.** Push and screw the crown.

In this position, the watch is water-resistant to 20 ATM.

**WARNING:** Always push and screw the crown after winding or setting the watch to ensure water resistant.

**NOTE:** When the watch has not been worn or wound for more than 35 hours, it is recommended to rewind it in order to ensure sufficient power reserve and accurate operation (see “Getting started”).

## DATE SETTING

1. Unscrew the crown to release it.

**WARNING:** In this position water resistance is not guaranteed and the crown is not protected by the crown guard of the case.

2. Setting the date: once the crown is unscrewed, pull out the crown to the first click (position 2). Rotate the crown clockwise to set the date.

3. Ensure the crown is correctly set back to its initial position (position 1).

4. Push and screw the crown.

In this position, the watch is water-resistant to 20 ATM.

**WARNING:** Always push and screw the crown after winding or setting the watch to ensure water resistant.

## TIME SETTING

1. Unscrew the crown to release it.

**WARNING:** In this position water resistance is not guaranteed and the crown is not protected by the crown guard of the case.

2. Setting the time: once the crown is unscrewed, pull out the crown completely to the second click (position 3). Rotate the crown counterclockwise to set the time.

3. Ensure the crown is correctly set back to its initial position (position 1).

4. Push and screw the crown.

In this position, the watch is water-resistant to 20 ATM.

**WARNING:** Always push and screw the crown after winding or setting the watch to ensure water resistant.

## TECHNICAL FEATURES

### Case
