

## **Boatgirl Bags**

The Boatgirl Bag collection consists of 6 unique designs. Boatgirl bags blend superior materials and top quality craftsmanship with brilliant designs and styles that make them revolutionary. We have diligently researched high-quality materials to find the perfect match for the needed functionality and look of our bags. We are invested in serious attention to detail so that your Boatgirl bag does just what you need it to do—perform well while looking great.

Our design philosophy originated from a desire to provide the rugged construction needed for harsh water conditions, yet our products are versatile enough to accompany any woman on any adventure, wherever that may be.

Boatgirl bags are built in Hendersonville, NC by Sew Co., a small woman-owned manufacturing company that is committed to quality craftsmanship, while paying workers a living wage. This allows Boatgirl to contribute to the economy of our state. Both Boatgirl and Sew Co. are invested in serious attention to detail so that Boatgirl bags do just what they need to do—perform well while looking great.

Boatgirl equips active women with the ideal bag to accompany them on their next adventure. Strong, smart, stylish. Like the women we know.

where you go, we go

For full description, specifications, details and materials used on each bag, please go to website link shown for each bag.

**Boatgirl Bags are built in NC!**

The entire Boatgirl Bag Collection is proudly built right here in North Carolina. Boatgirl is committed to quality craftsmanship and attention to detail—we do all we can to make your bag go the distance, so that you can go the distance. Our labor costs are significantly higher than costs for products that are made overseas, since our manufacturer pays its employees a living wage. There is value to this process and that matters to us - we are proud to support our state and community.

**Made with Sunbrella®**

Sunbrella fabrics are engineered to combine the highest level of design and performance. Boaters have made Sunbrella fabrics the No. 1 marine fabric because of its classic good looks, fade resistance, ease of cleaning and durability. Sunbrella marine awning can withstand the elements many times longer than traditional canvas without fading or losing strength. It is water repellent, bleach cleanable, mold/mildew resistant and it's made in the USA! For technical specifications, go to <https://goboatgirl.com/pages/technical-specifications-for-boatgirl-bags>. For more about Sunbrella, visit [www.sunbrella.com](http://www.sunbrella.com)
