

# Wet Robot Refurbishment

## Overview

The Wet Robot Arm is responsible for the safe transfer of the wafer between the source cassette and the HCLU. Over time the assembly components wear out and eventually fail. Entrepix offers a full rebuild service featuring upgrades and testing to keep your tool running.

## Highlights

- Incoming robot arm assembly inspection and additional part replacement recommendation are made (if any)
- Customer can choose to replace damaged, machined parts, as recommended.
- All internal moving parts are replaced with new
- All robot motor assemblies are upgraded to the new Entrepix design
- When robot arm has completed refurbishment it is installed and tested on a Mirra polisher
- Arm is shipped back to customer in custom packaging
