## sample 200mg Grape D8 Edibles

Sample ID SD230718-094 (81362)	Matrix Edible (Other Cannabis Good)							
Tested for Top Shelf Hemp Co

Analyses executed CAN+	Unit Mass (g) 42.494	Num. of Servings 10	Serving Size (g) 4.25					

Laboratory note: The estimated concentration of the unknown peak in the sample is 0.06% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannobinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 Concentration is estimated to be 0.45%.
