better

It's not *just* about cleaning...

While cleaning has never been more important, we believe effective cleaning is more than 'just' the removal of soil. It means ensuring the health and safety of people, while making the job easier, simpler, more efficient and even fun. It means consistent results all over the world, while protecting the world.

i-move 2.5B ensures a lot of happy faces and healthy bodies, thanks to the lightweight, small and ergonomic design. The 360° swivel hose and battery-powered freedom (no cords!) make it easy to move around in smaller or obstructed spaces.

...It's about *happy*
& *healthy* people

Small but fierce Compact power

Meet i-move 2.5B, the little brother of i-move 4B. Despite its small design and weight of only 5.28kg, the i-move 2.5B has ample power of 250 volt and a quite generous dust bag capacity of 3 litres. It's your ultimate little helper in smaller spaces and turns hard to reach places into easy to reach places without a sweat (or sore back).

Smell you later A fragrance to love

Sometimes you have to stop to smell the roses. Value the world around you and enjoy the little things in life. For instance, appreciate a delicious smell that fills the room. With i-scent we introduce a soft, soothing fragrance that you can optionally add to the i-move 2.5B. Bonus: it's eco-friendly and has antibacterial features.

No need to put your back into it

Put me on your back

With i-move 2.5B there's no need to put your back into it. Just wear it on your back, turn the power on, and start vacuuming. It's that easy. Thanks to the smart design you can change the dust bag without any hassle. With one easy click you open the dust bag compartment to switch bags. You don't even have to remove the hose.

- Batteries with power indicators
- Light weight of 5.28kg
- 360° swivel hose keeps things untangled
- Easy click & open system
- 2 filters for extra clean spaces
- Optional cartridge with soothing i-scent
- Nozzle can be used on soft and hard floors
- Remote control power switch

One nozzle to rule them all

The i-move 2.5B comes with one nozzle that can be used on both hard and soft floors. The hose is antistatic, so you can safely vacuum the carpet.

I love the smell of clean

You can place the optional i-scent cartridge in the canister and decide if you want the scent spread in a low, medium or high volume. The i-scent fragrance is soft and welcoming, giving any room a pleasant little bit extra.

Keep me in charge

The small-sized batteries can last up to 50 minutes. Make sure to recharge them in time so you can keep enjoying the effortless ease of i-move 2.5B.

Gentle for your body

The subtle weight of 5.28kg (incl. batteries) and ergonomic design makes the i-move 2.5B easy to work with. The brand new i-power 8.7 batteries are smaller and lighter than our other batteries.

I've got the power

Thanks to battery-powered freedom and the small form of the i-move 2.5B, you can easily move around in smaller spaces. Perfect for places that are usually hard to reach or when there are no sockets nearby.

Easy does it

Experience the joy of being freed from sockets and cords. Just place the device on your back, press the power button and start cleaning. The dust bag can easily be switched and the battery indicator conveniently shows you how much power there's left.

It runs in the family

All accessories of the i-move 4B can be used on the i-move 2.5B, with exception of the newly designed batteries. The i-move 4B and 2.5B make the perfect vacuum duo: use the 4B for (very) dirty places that need extra power and the 2.5B for (smaller) places where an agile solution is needed.

I may be small
But I am fierce

Faster

Thanks to the battery-powered freedom and small design you can easily and quickly move around small or obstructed spaces. The dust bag is switched within seconds. Open the bag compartment with one click and switch bags, no need to remove the hose.

Cleaner

Hard to reach places turn into easy to reach places with the agile i-move 2.5B. The device has 2 high-quality filters, powerful suction (14 Kpa) and strong dirt pickup at 1100mmHg. Enjoy Cleaner air filtered from large dust and bacterial airborne contaminants.

Greener

The optional i-scent cartridge releases an eco-friendly fragrance as spaces are being cleaned. You can use the accessories of the i-move 4B on the i-move 2.5B, which means sustainable use of existing parts. The batteries can be recharged.

Safer

The lightweight and ergonomic i-move 2.5B allows you to move with maximum mobility and efficiency. As you wear the device on your back, the weight is evenly distributed across your body. Thanks to the cordless design there's no risk of tripping over wires.

Better for everyone

The i-vac 2.5B is your perfect travel buddy when you need quick spot vacuuming or want to vacuum smaller spaces or hard to reach places. It's one of the lightest and smallest back vacuums in the market, especially designed for easy use.
