

Leading the way in real-time Fuel Management Systems.

REAL-TIME UPDATES

The next generation of Real-time Fuel and Fleet Management solutions...

The iFUEL Pro terminal uses its online connectivity to automatically transfer all transaction data to a secure website in seconds, leaving behind the requirement for downloads and manual interaction with the fuel management terminal.

iFUEL Cloud

Complete Control at your fingertips

iFUEL Cloud Pro is the complete fuel management package, stock control, depot transactions, vehicle and mileage capture & on-road fuelling data accessible from any web enabled PC, tablet or smart phone.

Communicating in real-time with the iFUEL Pro terminal you can be assured of accurate and to the second feedback on your fleets movements.

Real-time Updates

Watch transactions automatically appear on your own version of our secure website using PC, tablet or smartphone.

Total control of single or multiple home depot fuelling locations, real-time reports, update and alerts at your finger tips.

Cut Your Fuel Costs

It's never been so easy to monitor the fuel costs of your business - total efficiency and peace of mind.

Save Money

Improve your fleets performance using real-time vehicle and driver statistical reports.

Monitor Every Litre

Total awareness of every litre of fuel delivered, pumped and consumed.

Greater Control

24/7 access to your depot stocks and fuelling systems - reduce stock losses.

THE IFUEL PRO SOLUTION

The iFUEL range of terminals is used in bus and transport depots and utilises both card and touchless key technology.

IFUEL PRO OFFERS

- Online real-time technology
- Access via magnetic stripe cards, VTAG, NFC
