

## How to Use?

- Place the air humidifier on a flat waterproof surface
- Lift up the water tank and turn it around. Open the lid of the tank and fill it with a maximum of 2.8 liters of water
- Tightly close the lid and place the water tank on the base unit
- Switch on the device after plugging it and adjust the humidity level via the adjustment regulator
- Switches off automatically as the water depletes from the tank

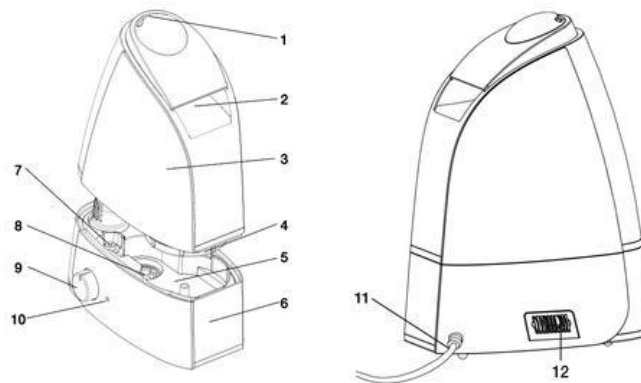

---

## For Aromatherapy

- Add a few drops of Essential Oils to the foam pads in the aroma compartment present at one side of the base.
  - View our complete range of Essential Oils
-

## KNOW YOUR HUMIDIFIER
