

How to Use?

- Spread out the heated underblanket flat onto your mattress starting at the foot end
- Make sure the underblanket is entirely flat without any creases
- Put your bed sheet carefully on top of the blanket
- Connect the controller to the underblanket by inserting the plug-in coupling
- Insert the main plug into the socket and turn on the switch
- Adjust it to a comfortable temperature setting among Levels 1, 2 and 3. The temperature settings are illuminated when switched on
- Enjoy a comfortable rest and relaxation

1. Supply plug 2. Supply cord 3. Controller 4. Illuminated temperature settings
5. Slider for ON/OFF and temperature settings 6. Plug-in coupling

REMEMBER

- Please go through the details on safety precautions, cleaning and maintenance in the instruction manual for Beurer Heated Underblanket.
- This heated underblanket must not be used and maintained by children without adult supervision
- Never place any object or another heat source (like heating pad, hot water bag etc.) on the heated underblanket while it is switched on. Do not puncture it with sharp objects either
- This product is not designed for use in hospital and institutional environments
- If the device is used continuously for a prolonged period, it is recommended that the lowest setting of the control should be used to prevent overheating
- Before cleaning, ensure that the supply plug is removed from the mains socket and the controller is detached
- Keep the product dry and clean. Store it in the original packaging when not in use
- If the temperature settings are not illuminated after switching on, send it to the Beurer Service Centre in India for repairs
