

How to Use?

- Its a good idea to cut your nails after a bath since they are softer and easier to cut. Alternately you can dip your feet in lukewarm water for a few minutes.
- Sit down in a comfortable chair with your feet flat on the ground.
- Hold the toenail cutter in your right hand, with the index finger positioned below the large loop as shown in the image above.
- Now continue cutting in a smooth linear motion without rushing.

REMEMBER

- Avoid cutting nails that are not giving in easily. Putting too much pressure might cause them to crack or break in an odd shape. Please visit a podiatrist to seek help in such cases
- After cutting nails, please ensure you clean the blades well - this is both for storage and reuse.
