

How to De-Pill?

- Lay down the garment on a flat surface or an ironing board.
- Hold the brush with one hand and gently brush downwards against the garment to remove lint - maintain the direction across the attire.
- Continue brushing until the fabric accumulates on the mesh of the brush and the garment is fuzz-free.
- Keep removing the lint from the mesh in between if necessary.
- Once done, clean the comb with an old toothbrush to remove the fine lint before storing it in a clean and dry box.

REMEMBER

- Do not over brush the garment as it might lose its sheen
- Clean the accumulated fabric on the mesh when needed

- Do not use on a wet garment to avoid roughing it up
- Use after ironing the garment for best results

P.S.: Kindly test the comb on a small area of the garment before proceeding with the complete attire
