The grid below may be printed to layout your electrical requirements for booths up to 20 x 20 or used as a sample to develop your own plan for larger exhibits. Please complete as clearly as possible, indicating the following.

- Location of the main power drop.** Power needs to be distributed from one location at which a panel or other piece of electrical equipment will be installed. It is recommended that this equipment be placed in a closet, under a table/desk or in another location that keeps it out of sight. Please provide specific dimensions.
- Location and load of all outlets.** Please provide specific dimensions and wattages/amperages. Please **do not** simply place an X where power is required.
- Booth orientation.** Please provide surrounding aisle and/or booth numbers, particularly for island booths. Also, please try to orient your booth to the overall floor plan so that the diagram does not have to be rotated.
