TR Turbocharger upgrade for BMW N55 (EWG)

PRODUCT FEATURES

Introducing Tomioka Racing's turbocharger upgrade for the BMW N55 engine featuring Electronic Waste Gates (EWG). TR's turbo offers a billet compressor wheel in 6+6 configuration which is larger compared to the factory turbo. The increase in diameter is further matched with larger porting of the interior of the factory-sized compressor housing. It looks like a factory turbo, but contains a larger 72mm compressor wheel and longer 35mm wheel-blade to improve airflow and extract more power from the N55 motor, achieving more efficient boost. No Core exchange is required. This is a 100% bolt-on balanced replacement turbo with improved performance over the stock unit.

SPECIFICATIONS

- / 100% Bolt-On
- / Large Compressor Wheel
- / 72mm Compressor Wheel
- / 35mm Wheel-Blade Length
- / Billet Compressor Wheel
- / Stock Location

KIT CONTENTS

- / Turbocharger
- / Gasket
- / Hardware Kit
