

TR GEN II GTX29 for 2015+ Subaru WRX and 14+ Subaru Forester FA20DIT

PRODUCT FEATURES

The next generation GTX29 turbo for the Subaru FA20DIT engine features 8% larger turbine wheel compared to previous version. In addition, the turbo also features a brand new dual ceramic ball bearing design from its previous generation. On the compressor side, the billet wheel is point-milled to improve airflow and reducing turbulence with the bullet locking nut. This turbo is perfect for users who look for quick spool turbo, gain in overall power band and top-end power for the Subaru FA20DIT turbo. All necessary fittings and gaskets are included in the box to make the installation process painless.

SPECIFICATIONS

Model		GTX29
Part Number		TR-TS1052
Bearing		Ball Bearing
Flange		STD Subaru 5 Bolt
Actuator		1.03 BAR (15 psi)
Compressor Diameter	Outlet	72 mm
Turbine Diameter	Inlet	61 mm
Maximum Power		600 HP
Turbine Housing		10cm ²

KIT CONTENTS

- Turbocharger
- Actuator
- Gaskets
- Hardware kit
