STANDING LAB LAMP

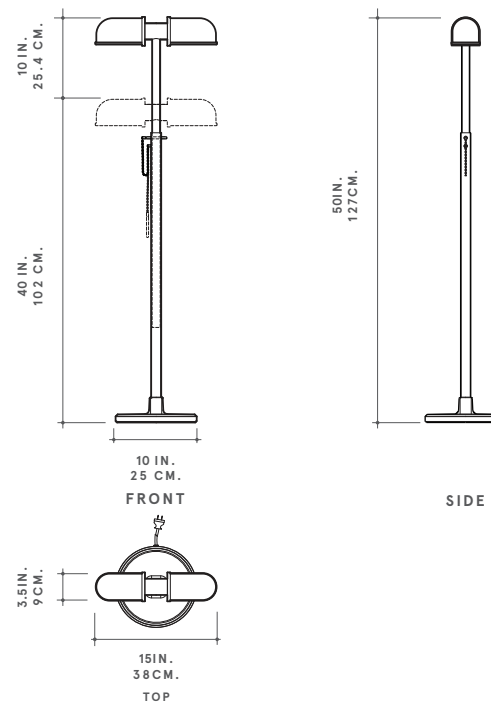

We are especially proud, in our *Standing Lab Lamp* of the telescoping height adjustment, which is held in place by an anti-fatigue pin that will never fail.

Meant to last for generations, *Lab Lamp* is our version of a library light, like what would have been used by scientists at an early MIT laboratory. Shade is directional, and swivels. Construction is bent and folded – no welding – and the base is cast. Pull chain is custom made.

Pictured here in brass, which darkens beautifully with age. *Lab Lamp* is available in all of our metals – from gilded rose gold to burnished nickel, pewter and silver.

Also available in a Table format.
