

GT Tools® Standard Sheath Blades

MADE IN USA

GT Tools® standard sheath blades are made of high carbon spring steel for maximum durability. These blades are designed to work with GT.357, GT.38 Special, GT.44, and GT.45 reciprocating auto glass cut out tools, as well as other industry recognized reciprocating tools.

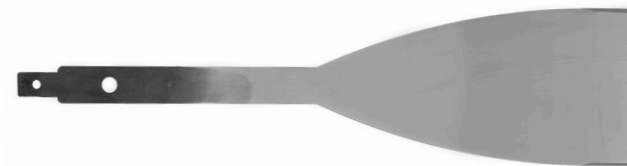

3" X 10" Standard Sheath Blade

AGKBS3X10

\$36

Great for vertical windshields with short length dashes that require less reach to access the urethane. Offers ideal rigidity and control.

3" X 12" Standard Sheath Blade

AGKBS3X12

\$36

Great for sloped windshields with medium length dashes that require more reach to access the urethane. Our most versatile blade.

3" X 14" Standard Sheath Blade

AGKBS3X14

\$40

Great for cab forward designed vehicles with wide dashes that require an extended reach to access the urethane. Ideal for new model vehicles.

GT Tools® Knife Blade Sharpener

AGKBS

\$16

GT Tools® Protective Blade Sheath

AGRKS

\$26
