

# Glass Racks

AGS1 (5-Slot)

**\$160**

AGS2 (9-Slot)

**\$200**

AGS3 (14-Slot)

**\$340**

Glass storage and transportation are a must in taking proper care of inventory. GT Tools® glass racks are engineered with a solid steel construction. These racks include a high durometer rubber base, dense foam lined steel posts, and a locking hinge top. Grab any of our 3 models for truck, van or in-shop storage.

### Hinging Glass Stops

These 5, 9, and 14-slot glass racks use hinging rubber flange glass stops mounted to the top of each post to hold the glass securely during transport.

### Protect your Glass

Each slot offers 22 inch steel posts covered with high density foam rubber to reduce marring or glass scratching during transport.

### Wear-Resistant Base

For added durability each stand is equipped with a durable rubber base that runs the length between each slot, resisting wear as windshields are slid in and out of the rack.

### Truck Bed-Ready

Pre-drilled bolt-holes in the base of the rack allow for a simple mount into any truck or van bed frame.

### Built To Be Used

GT Tools™ glass racks are built to be used. The heavy-duty, powder coated, steel construction offers the durability expected from a good auto glass rack.
