

NUETAG

NEXT-GEN SMART WATCH

4G Personal Safety GPS

New Guardian is a stylish wristwatch designed for teenage kids, the elderly and lone workers. The watch is a mobile phone with 4G connectivity, able to send the wearer's GPS location to specific contacts in an emergency.

4G Live Tracking:

Live and accurate GPS tracking means you can locate the watch on a google map, anywhere, at any time. This high level of visibility offers both security and peace of mind. Supports various 4G bands, it will fall back to 3G when there is no 4G coverage.

SOS Button:

Push the SOS button, and the watch will send SOS alarm's in real-time with the location details of the device.

Advanced Power Modes:

We have formulated advanced power modes allowing you to maximise your watch's full potential. Manage your watch remotely via the app, allowing maximum control and security when it matters most.

Video Call:

Now you can video call with your loved ones with ease, connecting your children with their loved ones.

Two-way Calling:

The SOS Smartwatch has both a built-in speaker and a built-in microphone so the user can have 2-way communication with their loved ones or an emergency monitor centre. Just like a mobile phone.

Location Accuracy:

Your 4G Smartwatch GPS unit uses multiple positioning technologies to get you the most accurate location by 2-5m. Get fast and reliable GPS location with 47+ satellites and indoor wifi location.

Set up Geofences & Alerts:

Set multiple Geofences and receive alerts as a device enters or exits your defined areas.

Waterproof:

Our 4G watches have a standard waterproof rating of IP67 which can withstand running water like in a shower (cannot be submerged for an extended period or over one meter in depth).

Safety First & Phone Book:

Block all unknown numbers from calling the watch, and only allow defined numbers to contact the watch.

Messaging:

Use our safe and secure in-app messaging service to text the watch. The watch can then send audio messages back to you.

Watch GPS FAQ's

Q: What should I look for in a GPS?

A: Although there are many features on a GPS device there are a core group which should be observed as a baseline, they are; battery life, tracking accuracy, data security, cell network certifications and the application used to access GPS should meet highest usability and accessibility standards.

Q: What are the costs?

A: Either the upfront cost of the watch (NO ongoing charges or fees) or our monthly plan

Q: Do I need a SIM?

A: Yes, but we'll provide the SIM for you, with a basic Telstra plan.

Q: Do you offer 24/7 monitoring?

Our partners at Blueforce have an experienced and fully-licensed team of operators, all trained in senior first aid provides 24-hour monitoring and technical support with certified response times exceeding industry standards, with access to interpreter services, multiple communication pathways to

receivers for alarm transmission, data reports and audio recordings of all events. Starts at \$35 a month.

Q: International roaming?

A: As long as your SIM supports international travel so will your watch. – Speak with our customer care team to learn more.

Q: How do I receive my Alerts?

A: Notifications and Alerts are sent directly to your App. You can also request for these to be sent via SMS and calls these alerts will use your SIM's plan.

Q: Can I preset my emergency contacts?

A: You can set up to 15 different numbers to SMS alert or call on press SOS.

Q: What is the data security policy?

A: At NutTAG we operate a safety and security first approach – we store all of our data on Amazon Web Services which are located in Sydney and offer a gold standard of data whilst in transit and at rest.

Q: Are you NDIS registered?

A. Yes, we are a NDIS registered provider. Multiple ways to claim, get in touch with our helpful support team to learn more about options available.

Q: How long will the battery last?

A: The device was designed with battery life in mind. Battery life is influenced by several factors, such as cellular coverage, GPS availability, temperature and your device's activity level. Depending on usage, mode and environmental factors battery life is generally one day. The battery can then be completely re-charged within two hours.

Q: After sales support?

A: We're here to help, through e`mail, live chat or call our hotline.

- ✓ Charged \$300 annually

Travelling to school

I have an autistic son who is a runner. A GPS tracker is a must for him and we have tried many local and international models, by far the best is the GPS watch for functionality, battery life and support.

The App has allowed us and the caring staff at his school to track him down with ease, after receiving a geofence breach alarm. The fear of losing him has now been relieved, very thankful for new technology.
