Did you get assigned dessert duty for your Holiday Party?

We’ve got you covered with these easy, reworked desserts from Olli.

ICE CREAM SANDWICHES

This one is easy! Load a scoop of your favourite ice cream between two Olli Cookies. For best results, let the ice cream melt a little before building your masterpiece & freeze for another few hours before you dig in!

CAKE POPS

This surprisingly easy dessert takes just a few steps. First, crumble your favourite Olli Cake into a large bowl. Add in your favourite icing, and mix until everything is well combined. The mixture should be sticky enough to hold a firm shape. Once you’ve got the texture right, cover a large sheet with parchment paper and start rolling them into bite-sized spheres. Dip lollipop stick ends in some melted chocolate and stick them into your cake balls. Let them chill in the freezer for at least 45 minutes. Once they are nice and firm, they’re ready to be dipped in melted chocolate and decorated with your choice of toppings!

CARAMEL SAUCE

This homemade caramel sauce is so easy: you’ll never buy store-bought again. Add sugar, Olli Butter Caramels & a little heavy cream to a medium saucepan. While on low heat, melt all ingredients together and whisk continuously until desired thickness. Take the sauce off the heat and add a splash of vanilla and salt. What can you dip it in? Anything. Literally anything.

GINGERBREAD HOUSE

What’s the key to building a better gingerbread house? (Bonus decorations! Olli’s hard and soft candies are not only perfectly delicious but beautifully coloured.)
Wrap up some wonder with our Rolling Wrapping Papers. Ask your budtender.

SUNSHOWER

Sunshower is driven by innovation. We’re inspired by the idea consumers should have the ability to curate their own high so you can Savour The Trip (wherever that trip may take you).

Prepare to be blasted out of this world! Each pack of Sunshower 10:1 Delta 8 Solar Punch gummies boasts 100mg of Delta 8 and 10mg of THC with no cannabis aftertaste. With a punch blend of delicious fruit flavours and 1mg of THC and 10mg of Delta 8 per piece, we’re giving spaced out a whole new meaning.

Delta 8 is a cannabinoid found largely in hemp. When introducing new cannabinoids into your routine it is important to start low and go slow to find a dose that works for you.
TOKYO SMOKE

We have been changing the public perception of cannabis since its inception through well-designed products and immersive retail. We've come a long way, always with the core belief that intentional cannabis usage can better people's lives.

Somewhere between intuition and foresight, Tokyo Smoke was born of a belief in cannabis as an intentional tool, worthy of design. Why shouldn't our cannabis experience offer the same level of individuality, function and aesthetic that we look for in any other thing we invite into our lives? How could we illuminate the possibility of cannabis within a prohibition landscape?

We started small. We opened our first coffee shop in an alleyway in downtown Toronto.

What we lacked in square footage, we more than made up for in intentionally designing a bold and approachable retail experience. This legal, normalized cannabis space allowed people to gather for the conversations they didn’t know they needed to have. Leading by example, we showed how cannabis can be seamlessly integrated into a mindful life. Once word spread, we were soon able to open locations across the city, ultimately becoming a recognized name in cannabis before ever selling our first gram.

Tokyo Smoke is an award-winning, design focused, cannabis retailer. We believe that cannabis is good, and that your shopping experience should be nothing short of great.

Now as a nationwide retailer, we take these humble lessons with us. We continue to sweat the details, building stunning visuals and designing innovative product, experiences and education that echo our core beliefs. Cannabis can be approachable and beautiful. Cannabis can be something to be proud of, and has been kept in the shadows for too long. We've never needed to convince anyone, only hold it up to the light in a way that makes the world stop and look.

We have been changing the public perception of cannabis since its inception through well-designed products and immersive retail. We've come a long way, always with the core belief that intentional cannabis usage can better people's lives. Tokyo Smoke empowers consumers to make well-informed decisions about safe, high quality products.

We provide our community with inspiring experiences to help them explore & pursue their purpose, shaping & guiding their lives. Well-trained education specialists and staff make for memorable, enlightening experiences. Every touch point is thoughtfully designed to make cannabis culture approachable & accessible for all. We provide and facilitate the exchange of wisdom so people can make informed purchases; we emphasize connection, transparency and integrity.
Introducing House of Terpenes Canntinis - a modern take on classic mocktails, mindfully developed for a new generation of sipping. This is a new time for cannabis. This is a new time for mocktails. This is the unhibition era. So, don't smoke up, drink up.

HOW TO ROLL A HASH JOINT

1. Grind up your favourite strain; as much as you would for your usual joint!

2. Break off a small piece of your favourite hash.
   - If your hash is firm, gently wave a flame around the hash to heat it up and soften.
   - For soft hash, roll it into a skinny snake in the palm of your hand.

3. Break apart or crumble the hash into small pieces.

4. Mix your crumbled hash and ground flower together.

5. Fill your joint (or cone) as you normally would.

6. Roll, lick, seal, twist, light, enjoy!

Warm up your winter with the tropical flavours of The High Roller Club Grilled Pineapple Gummies!

What is hash rosin?
Livehash rosin does not use any solvents in its production, making it the healthy and proper choice for edibles without worrying about ingesting any trace solvents.

To isolate the plant’s natural components, rosin extraction relies on physical forces—cold, heat, agitation and pressure—to yield a cleaner product and consumption experience.

“Fresh Frozen” live rosin is made by freezing the plant immediately after harvest, preserving the trichomes that contain the cannabinoids and terpenes. Next, the plant material is gently agitated in an ice-water bath which separates the trichomes from the rest of the plant material.
