# **MGX Synthetic Paper**

### Let MGX Take You Somewhere Beautiful

## A Revolutionary Product Line with Unparalleled Performance & Compatibility

MGX Synthetic Paper is a unique, multi-polymer film. Its proprietary topcoat enhances reprographic and performance characteristics across a broad spectrum of technologies while addressing many of the challenges that printers have previously encountered when running plastics. Additionally, for two-sided applications that require enhanced opacity, printers can find a solution in UniSyn Opaque.

#### **Simplified Synthetic Printing**

Mitigate the typical challenges associated with printing on plastics, stop outsourcing or passing on related jobs, regain control, and grow your business.

#### **Faster Dry & Cure Times**

Compatible with standard conventional litho inks, accelerates dry times, and improves post-cure rates for UV inks.

#### **Superior Ink Adhesion**

Topcoat chemistry anchors inks to the surface to improve rub and scuff resistance, and eliminates the need for any pre-priming.

#### **Broad Compatibility**

Engineered for HP Indigo, conventional & UV offset\*, UV & aqueous flexo, UV inkjet, and thermal transfer.

#### **Enhanced Durability**

Excellent machine and cross direction tear resistance, coupled with water and chemical resistance for outstanding longevity.

#### **Optimal Color Accuracy**

Superior color vibrancy and accuracy reduces make ready waste.

#### **Lasting Shelf-Life**

No concern for dyne level degradation due to the topcoat technology, material still prints beautifully 12 months+ later.
