

StoneCast Product Care

Basins, Slab Tops & Baths

Stonecast basins, baths and slab tops are constructed by skilfully combining natural minerals with high performance resins to construct a strong, beautiful material with unique properties. StoneCast products are capable of being moulded into intricate & precise designs, where traditional materials are limited.

Gloss White Finish

1. For daily care simply use a non-abrasive cleaning product or a mild dish soap and warm water solution.
2. After each use, rinse the inside of your basin or bath with water and wipe dry with a soft cotton cloth.
3. To maintain the product aesthetics and help prevent stains, a beeswax polish can be applied once a month to form a protective barrier.
4. To remove stubborn stains such as grease, mildew, oil, paint or ink stains, use warm water with either a gentle cleaning product or soap solution.
5. Abrasive cleaners should never be used on StoneCast Gloss White basin or baths. If a product feels gritty when rubbed between your fingers, it is not safe to use on gloss finishes.
6. Small scratches can be removed by using a fine paste.
7. Limescale can be treated with a solution of water and white vinegar.

To clean a freestanding bathtub with a semi gloss finish, use a mild cleanser or mild dishwashing detergent. **Never use abrasive cleaners, pads, or cream cleansers with grit.**

Warranty Information

Basins, Slab Tops & Baths

StoneCast or Composite Tops	5 Years
StoneCast Slab Tops	5 Years
Quartz Slab Tops	5 Years
StoneCast Mineral Baths	10 Years

GENERAL CLEANING TIPS

Do use a soft cloth for cleaning.

Regularly clean with mild liquid detergent or soap and water.

DO NOT use cream cleansers or bleach. These substances are abrasive.

DO NOT use cleaning pads with abrasive surfaces as this will scratch the Gloss Finish.
