

StoneCast Product Care

Basins, Slab Tops & Baths

Stonecast basins, baths and slab tops are constructed by skilfully combining natural minerals with high performance resins to construct a strong, beautiful material with unique properties. StoneCast products are capable of being moulded into intricate & precise designs, where traditional materials are limited.

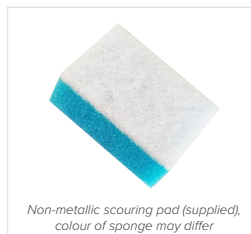

Matte White Finish

Matte White Stonecast Products are made from natural Dolomite Stone and Resin and finished with a Nanocoat creating a highly durable and easy-to-clean product designed for everyday use. This is more porous than Gloss White products therefore cleaning may occasionally require a mild abrasive cleaner and scrubbing to remove any marks. To clean a Matte White basin or bath use a mild or mildly abrasive cleanser. A soft scrub may be used on matte finishes to tackle more stubborn stains. We suggest using these sparingly and infrequently.

1. For daily care simply use a non-abrasive cleaning product or mild dishwashing detergent and warm water solution.
2. After each use, rinse the inside of your basin or bath with water and wipe dry with a soft cotton cloth.
3. To remove stubborn stains such as grease, mildew, oil, paint or ink stains, a mild abrasive cleaner is recommended.

NOTE: MATTE WHITE FINISHES CAN TOLERATE MILDLY ABRASIVE CREAM CLEANERS. WE SUGGEST USING THESE SPARINGLY AND INFREQUENTLY.

4. Stubborn stains can be treated with a warm water and gentle cleaning agent or soap solution.
5. Scratches on the surface can be buffed out with a non-metallic scouring pad (supplied) and then maintained with oil. Limescale can be treated with a solution of water and white vinegar.

Minor scratches and difficult stubborn stains including hair dye can be buffed out with the supplied scouring pad in a light circular motion. Wipe off residue with a damp cloth.

Warranty Information

Basins, Slab Tops & Baths

StoneCast or Composite Tops	5 Years
StoneCast Slab Tops	5 Years
Quartz Slab Tops	5 Years
StoneCast Mineral Baths	10 Years

GENERAL CLEANING TIPS

Using a soft cloth for cleaning after each use will keep your product clean and help prevent water spots.

Regularly clean with mild liquid detergent or soap and water.

DO use mildly abrasive cleaners sparingly for stubborn stains.

DO use the non-metallic scouring pad provided for stubborn marks and stains
