Fade Resistant
Fortified Neutrialisers
No Splatter or Pooling
Organic and Inorganic

PATCH TESTING

We always recommend patch testing before performing any form of brow service. A patch test should be performed a minimum of 7-10 days before introducing pigment into the skin by a qualified individual. If a client does have any form of reaction, discontinue use.

PRE-NEUTRALIZED

Our LI pigments are pre-neutralized. The pigments were specifically developed to avoid the colours aging with different shade bases. If the correct colour is used on the appropriate skin tone, the colour will heal into a lighter and softer version of the shade used.

LI PIGMENTS INCLUDES **10 SHADES**

USING OUR INNOVATIVE FORMULA

	FP	TEMP	BASE COLOUR	COLOUR CONSIDERATIONS
 BEACH BLONDE	I - III	SLIGHTLY COOL	MORE NEUTRAL YELLOW AND GREEN	This is a well-balanced light to Medium Blonde color. Darken with Baby Blonde, Light Walnut, or Harvest Brown depending of the deepness that you want to achieve. For additional warmth add Spiced Rum.
 BABY BLONDE	I - III	SLIGHTLY COOL	WARM YELLOW AND GREEN	Baby Blonde with brown undertones, can be use alone on moderately cool skin undertones. This shade is a good option for blondes who want a medium taupe eyebrow. An endless range of blondes may be created mixed.
 SPICED RUM	I - VI	MEDIUM WARM	WARM NEUTRAL YELLOW WITH A SMALL AMOUNT OF WARMTH	This is a very versatile medium warm color. It could be used as a brown color, as well as an additive to warm up other shades. Favorite Combinations: Spiced Rum and Brooklyn Brown. Caution is advised due to the warm base.
 LIGHT WALNUT	I - IV	MORE NEUTRAL	MORE NEUTRAL YELLOW WITH A SMALL AMOUNT OF WARMTH	This is a good option to obtain a medium brown color.
 HARVEST BROWN	I - IV	SLIGHTLY WARM	MORE NEUTRAL YELLOW WITH A SMALL AMOUNT OF WARMTH	This is a rich, natural medium brown color. You can darken this shade using small amounts of Dark Roast or Brooklyn Brown.

DISCLAIMER: Brow Code Li Pigments have been formulated specifically for the eyebrow area. All pigments are Organic and Inorganic.

	FP	TEMP	BASE COLOUR	COLOUR CONSIDERATIONS
 BRONZE	I - IV	SLIGHTLY WARM	MORE NEUTRAL YELLOW WITH A SMALL AMOUNT OF WARMTH	This is a stunning dark brown colour. Can be used straight without mixing.
 TOASTED TAUPE	I - III	MEDIUM COOL	GREEN AND COOL YELLOW	A dark brown eyebrow colour. Use to obtain a medium to brown-black eyebrow shade.
 PERFECTO BROWN	II - IV	SLIGHTLY COOL	GREEN AND COOL YELLOW	This is a stunning dark brown colour. Can be used straight without mixing.
 BROOKLYN BROWN	IV - VI	VERY COOL	BLACK/BROWN	This is a beautiful cool eyebrow color. For additional warmth, add small amount of Spiced Rum.
 DARK ROAST	IV - VI	VERY COOL	BLACK/BROWN	A dark brown shade This is a very cool color. This is a good option for clients who request a dark eyebrow. For additional warmth, add small amount of Spiced Rum.

DISCLAIMER: Brow Code Li Pigments have been formulated specifically for the eyebrow area. All pigments are Organic and Inorganic.

MICROBLADING PENS

These disposable Microblading tools have been designed, tested and refined specifically for flawless Brow PMU. The Microblading Pens have been created with ease, simplicity, and efficiency in mind. By using a disposable microblading tool, you won't have to worry about cleaning or sterilisation, which will save time for you!

Each sharp microblade is fixed into the pen at the perfect angle to prevent the needles from falling off during operation and to achieve ideal pigment implantation and retention.

Each hand tool is made of high-quality medical stainless steel and can be used with microblading pigments and with regular PMU pigments. The tool also features an anti-slip grip!

Every disposable pen is EO Gas sterilized, with a specific lot number and expiration date stamped on each individual package.

They come in a pack of 10 disposable microblading pens. For single and professional use only.

1 18U.018 | Angled 20° 18 MM U Shape #18 Blade

- U shape needle, with 18 pins which represent a needle size for all brow shapes, from thin to thick eyebrows.
- Lining needle type.
- Lightly angled to help you see your work better during the procedure.
- Diameter of needles 0.18mm, which is thin and helps the technician with sharpness. No heavy hand power is needed.
- To be used to create fine and delicate hair strokes.
Could be used with a sliding hand motion or back and forth.
- Eyebrows use only.

1.

A diagram showing a needle with 18 pins. The needle is light gray and has a slight upward curve. The pins are represented by horizontal lines of varying lengths, creating a fan-like shape at the tip. A small circle with the number '1.' is positioned to the left of the needle.

2.

A diagram showing a needle with 18 pins. The needle is dark gray and is straight. The pins are represented by horizontal lines of varying lengths, creating a fan-like shape at the tip. A small circle with the number '2.' is positioned to the left of the needle.

2. **17SH.3R** | Angled 20° 0.30 THREE ROWS #17 SHADING BLADE

- Shading Needle type, with 3 rows of 17 needles, attached all together at the base.
- Technician can use the full 17 pins in full contact with the skin or just the third front part of the pins or the last third part of the needle for different shading effects or saturation effects
- The central part, and when all needles are in contact with the skin, will give a regular shading effect.
- The wider third front part will help with larger areas, and give more pixelated effect (less saturation) as the needles are more apart of each other.
- To be used to create shaded eyebrow from very soft pixel brows to full bold eyebrows.
- Eyebrows, Breast, Scar Camouflage.
- The use of the third end tighter side will help with thinner part of the eyebrows like the tail, and will give more saturated color as the needles are closer to each other.
- To add saturation, just gently layer color in until desired saturation obtained.
- Tapping movement only.
- Lightly angled to help you see your work better during the procedure.
- Excellent sharpness of the needles. No heavy hand power is needed.
- To be used to create shaded eyebrow from very soft pixel brows to full bold eyebrows.

3.

3. **17C.016 (14C.018) | Angled 20° 18 MM U**

SMALLER BLADE HOLD CURVE #14

- Curved shape needle, with 14 pins which represent a needle size for thicker brow shapes.
- Lining Needle type.
- Technician can use the full 14 pins in full contact with the skin or just the third front part of the pins for thinner brows or little details.
- Lightly angled to help you see your work better during the procedure.
- Diameter of needles 0,18 mm, which is thin and helps the technician with sharpness. No heavy hand power is needed.

To be used to create fine and delicate hair strokes.

To be used with a sliding or tapping hand motion, but no back and forth movement.

Eyebrows, Scalp, Eyeliner use

FAQ

Is the Brow Code Li pigment line PETA Certified?

Yes! The pigments are PETA Certified, which means we do not conduct or commission any animal tests.

How many services does one Brow Code Li pigment bottle offer?

For permanent cosmetics, only a tiny amount of pigment is necessary to produce colours. Typically no more than a gram of pigment is doled out per procedure. Each 15ml bottle will pour 30 small pigment caps.

Do the pigments work for any procedure method (manual or machine)?

Yes! Brow Code's PMU line has been specifically designed to suit all kinds of machine and hand tool procedure methods.

Can I mix Brow Code Li pigments with other brands?

No, we do not recommend mixing different pigment brands with Brow Code Li pigments.

What is the shelf life of the pigment?

If you leave the pigment unopened, the product has a shelf life of three to ten years if kept in the correct storage conditions (please see our recommended storage conditions below). However, once you have opened the pigment, the product must be discarded after 12 months.

What is the best way to store my pigments?

We recommend storing the pigments in temperatures ranging between 5-25°C/41-77°F. To maximise the shelf life of the pigments, the product should always be stored in a cool, dry location, where UV rays are avoided.

Are the pigments vegan?

Yes! The Brow Code Li PMU line is vegan, cruelty-free, and PETA certified.

Do I need to do a patch test?

Yes, we always recommend patch testing before performing any form of brow service. A patch test should be performed a minimum of 7-10 days before introducing pigment into the skin by a qualified individual. If a client does have any form of reaction, discontinue use.

Do the pigments contain nut oils?

Brow Code Li PMU line does not contain nut oils.

Can these pigments be used on eyebrows, breasts/nipples, and to camouflage scars?

The selection of pigments available in the Brow Code Li Pigment PMU line is focused on the eyebrow area. It offers a limited colour selection for nipple-areola and camouflage.

Are the Brow Code Li Pigments organic or inorganic?

The Brow Code colours were formulated using both organic and inorganic colorants. The pigments are considered a blend of both; i.e. hybrid.
