

BROW CODE

## AFTERCARE INSTRUCTIONS

### BROW TINT

- Follow your stylists' recommendations and avoid tweezing in between appointments to maintain your shape.
- Avoid using makeup and facial cleansers around the brow area for the following 24 hours.
- Avoid prolonged exposure to direct sunlight, the use of sunbeds, saunas, steam rooms and swimming pools for 24 hours.
- Avoid exfoliating and using anti-ageing products around the brow area for at least two - three days prior to and post treatment.

- Avoid using any self-tanning products on the face for around two-three days either side of the treatment.
- Avoid the temptation to over touch the brow area after a treatment. Touching with hands/fingers can lead to oils entering opening pores and clogging them.
- Remember your tinting results will be darker and more defined immediately after your treatment but will begin to fade depending on the frequency of cleansing.
- Inform your stylist immediately should you experience any swelling, itchy rashes, bruising, skin grazing or cuts after your treatment so they can advise you on the correct procedure to follow. If you have any questions or concerns, be honest with your stylist – we don't know what we don't know!
