

Indus Valley
henna

INSTRUCTIONS FOR USE OF BROW CODE INDUS VALLEY HENNA

Before

After

PREPARATION OF TINT:

1. MIX

Mix the capsule of desired BCIV Henna colour with 12-15 drops of the BCIV Rose Water. Set the mixture aside for 5-10 mins to allow the henna powder to form a smooth, strong paste.

2. CLEANSE

Cleanse the brows using BCIV Brow Conditioning Cleanser. For oily skin types or when removing heavy make-up, work your fingertips in a circular motion to deeply cleanse the brow hairs and surrounding skin.

3. EXFOLIATE

Exfoliate the brow area using the BCIV Brow Scrub. It is essential to remove any build-up of dead skin cells to allow the henna to create a more even and longer lasting stain.

4. APPLY

Apply the first layer of henna. The first layer can be applied thinly for a fast application. When applying the second layer, allow more time spent on your second application for perfecting the brow shape, defining crisp lines and applying a thicker layer of henna for an extended processing time. For stubborn hairs, a third layer can be applied.

5. REMOVE

Remove the dried henna by soaking each brow with a dampened cotton round using BCIV Rose Water. Soak each brow until the dried henna becomes a paste again then wipe away the excess henna.

6. NOURISH

Treat the brows by massaging the BC Brow Gold oil into the brow hairs and the skin. The Brow Gold helps to lock in the colour for a longer lasting stain whilst adding extra nourishment and shine to each hair, creating fuller, healthier brows.

7. ADVISE

Advise the best suited after care. Ensure the client keeps the area dry for 24 hours post service and applies BCIV Brow Gold Oil daily to help maintain the finished look.
