

BROW CODE

## INSTRUCTIONS ON USE OF BROW CODE LUSTRE LAMINATION

CONSULT & TEST PATCH FIRST

---

### PREPARATION

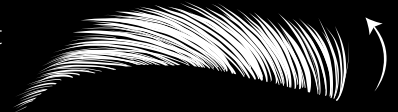

Ensure your brows are cleansed, oil-free and dry prior to starting the below application.

### BROW ADHESIVE

For clients with unruly brows, apply Brow Adhesive evenly throughout the brow in a thin layer. Use a lamination comb and fix the hairs in place in an angled and upward direction. Work quickly as it will dry fast. Ensure you are setting the brow in the exact direction you wish to laminate the hairs in. Wait until the adhesive is dry before moving on.

### PERMING SOLUTION

Once dry, on top of the adhesive layer (if applied), apply one sachet of Brow Perming Solution to one of your client's brow at a time. One sachet services both eyebrows. Apply the solution to the hair area only.

### BROW WRAP

Cover brows with the Brow Wrap & make sure the hairs are fixed in the desired position. Leave to process for 5 to 9 minutes depending on your client's hair type (no longer than 9 minutes):

- Very Thin or Fine Brow Hairs: 5-7 minutes
- Medium or Normal Brow Hairs: 7-8 minutes
- Coarse or Stubborn Hairs: 8-9 minutes

### REMOVE

Remove the Brow Wrap and use a dry cotton tip or pad to remove the Brow Perming Solution from the eyebrows.

### FIXING SOLUTION

Apply one sachet of Brow Fixing Solution to each brow using a new cotton tip. One sachet services both eyebrows. Cover your client's brows with Brow Wrap & make sure the hairs are fixed in the desired position. Leave to process for 5 to 9 minutes depending on your client's hair type (no longer than 9 minutes). The same time-frame applies as outlined in step 4.

## REMOVE & TINT IF DESIRED

Remove the Brow Wrap and use a dry cotton tip to remove the Brow Fixing Solution from your client's eyebrows. If desired, apply Brow Code Tint using the 123 Brow Brush to add colour to the brows.

Please be mindful that lamination increases the depth of colour. Take care with the timing process for tint by watching the development of the colour closely. Make sure the tint removal process is done using a dry cotton tip.

## KERATIN NOURISH

Apply one sachet of Brow Keratin Nourish Cream to each brow. One sachet services both eyebrows. Using a lamination comb, brush the cream evenly through your client's brows. Leave on to nourish brows.

## AFTERCARE:

What should and should not be done 24 hours post treatment for longevity of results:

- Keep brows dry for 24 hours.
  - Use Brow Code Gold Brow Growth Oil daily.
  - Do not apply make-up or undertake further eye treatments for at least 24 hours after your treatment.
  - Avoid swimming/sauna/working out for 24-48 hours. Any excess moisture after this time can cause a slight curl/frizz to the brow hair.
  - Do not allow prolonged exposure to direct sunlight or heat.
  - Do not apply Retin-A, AHA or exfoliate around the brow area for 72 hours either side of the treatment.
  - No self-tanning products should be used on the face for one week prior and 48 hours after treatment.
- 

**NOTE:** If any stinging or swelling occurs, apply a cold compress to soothe and seek medical advice. Be sure to let the technician know of any adverse reactions.
