

Evergreen Scale Models is pleased to be able to offer custom cutting of our shapes, strips and sheets to its internet customers. As part of this program, we offer free quotations which are prepared on a per job basis as well as quick turnaround times. This service is currently being used by Architectural firms for modeling and architectural schools as well as engineering and public schools for special projects and educational development. Besides schools, the custom cut strips, sheets and shapes are also used as shims, spacers and insulators and are provided to manufactures of electrical components, machinery manufactures as well as suppliers of windows, doors and the automotive industry.

All products are made from High impact polystyrene and can be supplied in any quantity needed for your next project.
