

Handy Helpful Tips for Prior & Post DIY Green Reaper Applications - Spiders

Prior to Application

- It's recommended to leave spider webs present for the application and remove in 3-4 weeks' time, or unless:
- You are intending to carry out any interior/exterior coating or waterblasting. If so then spider webs should be removed prior to application.
- Clear all floor area (including vinyl etc) of toys, books, cables etc.
- Vacuum thoroughly throughout the house (all floor coverings).
- Strip all beds in property and launder.
- Put away all foodstuffs, utensils, appliances securely inside cupboards.
- Put away toothbrushes, cosmetics etc.
- Remove all pets from the property on the day of treatment and don't allow return until treatment has completely dried. Make sure fish tanks are securely covered and turn off air pump until ventilation process occurs.
- Persons need to vacate property for at least 3-4 hours or until treatment has completely dried.

Post Application

- Persons returning to the property need to immediately open all windows and doors to ventilate property.
- Never allow children, infants, pets or persons onto treated surfaces until completely dry.
- Refrain from using any cleaning products or wiping any of the treated surfaces for 3-6 months.
- Remove and dispose of any dead insects as they appear.
